

1. Power On

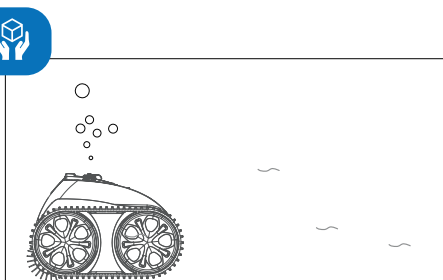

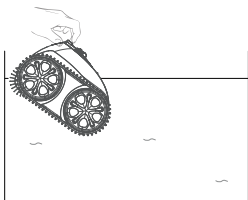

Press the button: blue light indicates the robot is powered on

Press the button again: red light indicates the robot is powered off

 **POWERED ON**

 **POWERED OFF**

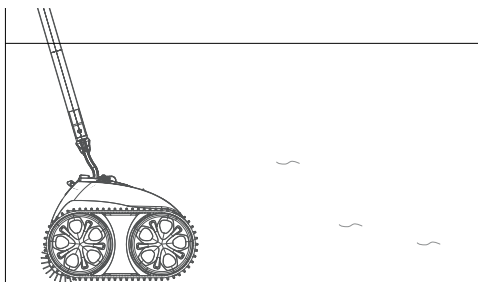

2. Place Gently in Pool

Place the AquaClean into the pool.

Submerge the AquaClean into water for 20 seconds to empty trapped air.

3. Lift Out of Pool

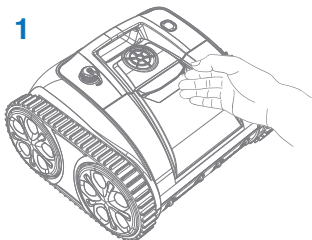

Depending on the battery charge, the AquaClean will move to the pool edge when it finishes working.

Use the provided hook to retrieve out of the pool.

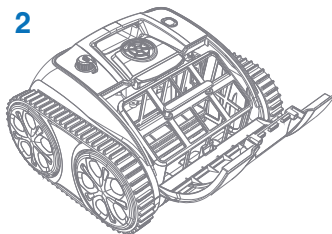

4. Clean After Use

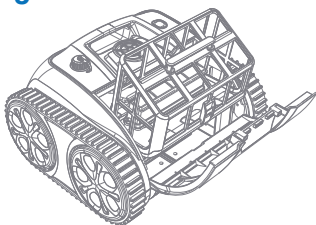

1

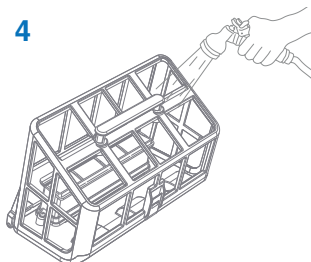

2

3

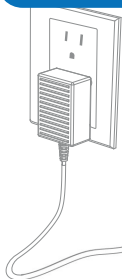

4

Take out the filter basket and rinse it with water.

Make sure the filter basket is clean after each use.

5. Charge the Robot

CHARGING

FULLY CHARGED

Make sure the charger and charging port are clean and dry before charging.

It is recommended to store the unit fully charged if not going to be used for longer than 6 months

Use original and authorized charger only.
